Facebook hacked passwords list Hack Your Facebook Account For Free! Facebook hacked passwords list - kennethQ: Error: Fatal error: Allowed memory size of 134217728 bytes exhausted I have a section of code that is running fine on my local development environment, but when I deploy it to my server the code runs fine for about 5-10 minutes, then throws an error: Fatal error: Allowed memory size of 134217728 bytes exhausted (tried to allocate 203 bytes) I'm not sure why it works fine during development, but after deployment to my server, it fails. A: Most likely, it does not store all the data you use in the session, so that at end of life, the session_data_t storage is too small to hold it, resulting in the error. Start by checking how much memory is used by each session_data_t member: \$ less /var/lib/php5/sess_youruser1 You can increase that storage size with: ini_set('session.save_handler', 'files'); ini_set('session.save_path', '/tmp');

ini_set('session.use_cookies', 1); ini_set('session.use_only_cookies', 1);
ini_set('session.cookie_httponly', 1); ini_set('session.cookie_secure', 0); UNPUBLISHED UNITED
