The 1.5-pound program is simple to use and let me quickly share my images with others. Overall, we are happy with what Adobe has managed to accomplish with this update. Photos with objects like those seen in the magazine ad at the top of the page, which we took with the iPhone, are easier to process and edit thanks to the new Object Selection tool. If you can afford a new device, the iPad Pro is a really good option for editing photos, and the new Paper sketching and digital drawing tools look really nice when adding visual elements such as textures, patterns, or color gradients. Today, a tool like this would have a hard time competing with what is offered by Google's Allo app and what the Google Assistant offers. MicroMessaging and Voice 2.0 are set to become integrated with the Google Assistant in Android devices, but Adobe doesn't seem to have plans toward that course. On the other hand, the new integration with the Paper app for iOS makes the whole process of drawing a colorful piece of art a lot more fun. The same goes for the Acula app, which lets users create patterns and shapes with tools like the looper, divider, and eraser. Both the Adobe and Apple apps are refined experiences. Are there any other handy photo editing apps like Photoshop? Probably the best place to check would be the App Nexus Photo Store section. Apple Photo Montage, which lets you seamlessly stitch multiple photos together, has recently been removed from the iOS App Store. There are plenty of other alternatives, such as Zonemodder and Moment Photo Collage.
