3 - What's in the Book? - [Teacher's Edition] By Theresa Fossum What's in the Book? The book is all about the beginning of every scientific field - it is the beginning of the scientific revolution. This book tells of how the findings, ideas, and beliefs of the ancient world started to change. You'll learn about what Aristotle thought about the world, what changed about his thinking, how Aristotle changed thinking throughout the world, and what it meant for doctors and hospitals. This book takes you through major milestones in human history and shows how they influenced the medical field. The chapters are organized in a chronological order to show the progression of ideas in medicine from the ancient world to today. The book is written in an easy to understand, and entertaining, style. You'll find stories and information you won't find in many books. The book is perfect for anyone interested in history, science, or anatomy. What's in the Book? is the most important reference for medical students in the beginning of the 21st century. Teresa Fossum is a student at the Uniformed Services University of the Health Sciences. Her current work focuses on orthopedic surgery. The Publisher's Weekly of April 25, 2008, wrote "Scholarly curiosity never loses its appeal, and Fossum's book is a fine specimen of it."
